

NIRIG response to Network Codes: Consultation on Requirements for Generators (RfG) Banding Thresholds in Northern Ireland

16 May 2017

The Northern Ireland Renewables Industry Group (NIRIG) represents the views of the renewable electricity industry in Northern Ireland, providing a conduit for knowledge exchange, policy development, support and consensus on best practice between all stakeholders. Committed to making a positive difference, we promote responsible development, support good community engagement and deliver low-cost electricity generation from sources such as onshore wind, tidal, solar and storage using our greatest natural resources.

We welcome the opportunity to respond to this consultation and our answers to the questions raised are set out below.

Do you agree with the banding proposals as set out in this paper?

Yes

Do you believe that lower thresholds should have been considered?

No

Do you have any views on the general approach on the extension of the threshold of type-testing as described in Section 7?

No

Are there any other considerations you believe the TSO should consider in finalising the proposals?

No

Any other comments.

No

**Do you agree with the removing of the existing Types A, B and C in the NIE Networks
Distribution Code?**

Yes

If you have any questions or queries on the above please get in touch.
